

## EXOSENS ANNOUNCES PRESENCE AT EUROSATORY 2024

PRESS ALERT

MERIGNAC, FRANCE – 14 JUNE 2024

*17TH-21ST 21 JUNE 2024  
EUROSATORY, PARC DES EXPOSITIONS PARIS-NORD VILLEPINTE  
HALL 6 STAND K51*

Exosens, the world leader in amplification, detection and imaging technologies, announces it will be exhibiting at Eurosatory, the world's largest specialist defense exhibition, on stand K51 in Hall 6.

The high-tech company, with over 85 years' experience on European and international soil, will showcase its latest product innovations for the defense market.

Photonis, a brand of the Exosens group and world leader in image intensifier tubes, will showcase its flagship products and 4G+ and 4G technology. Photonis has become the benchmark for European armed forces, closely meeting their needs. Over the years, night vision has become central to modern warfare, as operations increasingly take place at night. Drawing on decades of expertise, Photonis offers image intensifier tubes which improve soldiers' tactical situational awareness, agility and mobility, as well as their targeting and driving capabilities, even on the darkest of nights.

Together, **Photonis** and **Xenics** - Exosens' specialist infrared camera brand - are imaging technology experts with cameras covering the full spectrum from UV to LWIR. The company will show a UV detector for missile launch detection systems for aircraft and armoured vehicles, intensified and low-light cameras to improve visibility in driver vehicle applications for situational awareness, shortwave infrared (SWIR) cameras to provide better visibility in difficult conditions, as well as thermal cameras to help identify targets offering higher quality images regardless of day- or night-time conditions.

Demonstrations of infrared cameras and a burst image intensifier tube hologram will be available to view on the stand.

If you would like more information and/or to speak with an Exosens expert on site or ahead of the show, please contact us at [exosens@open2europe.com](mailto:exosens@open2europe.com).

### ABOUT EXOSENS:

Accompanied by Groupe HLD since 2021, Exosens is a high-tech company, with more than 85 years of experience in the innovation, development, manufacturing and sale of high-end electro-optical technologies in the field of amplification, detection and imaging. Today, it offers its customers detection components and solutions such as travelling wave tubes, advanced cameras, neutron & gamma detectors, instrument detectors and light intensifier tubes. This allows Exosens to respond to complex issues in extremely demanding environments by offering tailor-made solutions to its customers. Thanks to its sustained investments, Exosens is internationally recognized as a major innovator in optoelectronics, with production and R&D carried out on 10 sites, in Europe and North America and with over 1,600 employees.

Exosens is listed on compartment A of the regulated market of Euronext Paris (Ticker: EXENS – ISIN :FR001400Q9V2) and is a member of Euronext Tech Leaders segment.
